

***Editor's Note:*** EPA deleted references to diisocyanate polymers under TOXICOLOGY, Repeated Dose Respiratory Tract Toxicity and Conclusions, in response to comments received from the American Chemistry Council's Request for Correction #04025, dated September 8, 2004, and EPA's letter of response, dated December 21, 2004. In addition, two new Appendices were added. Appendix A-1 defines the terms monomer, prepolymer, polymer, and polyisocyanates. Appendix A-2 includes information on the monomer content in prepolymers and polymers. EPA also updated the Repeated Dose Respiratory Tract Toxicity and Conclusions to reflect additional toxicity data received by the Agency on prepolymeric diisocyanates. The correspondence from the American Chemistry Council and EPA's response can be accessed on EPA's website at <http://www.epa.gov/quality/informationguidelines/iqg-list.html>.
